### Feedback

Grade for assignment	A
Graded on	Thursday, 26 November 2015, 11:24 PM
Graded by	 Muhammad Usman Iftikhar

Feedback comments	 <b>Grading notes:</b>  - Task 12 says “The result should be presented with a “single” decimal correctly rounded off.” You just completely rounded it off.  <b>Conclusion:</b>  Good job. Although you have a minor mistake, but your grade for this assignment is A. But next time be careful a single mistake will not give you an A grade.  <b>Other notes (not affecting your grade):</b>
-------------------	---

- Task 13, instead of using `charAt` multiple times, you can use `substring(0,4)` function of `String` class.
- Task 14, you don't need to generate 0 when what you want is 0. For example, this line is unnecessary **int**`first = generator.nextInt(1);` when you can simply declare `first = 0;`
